

SoftTouch™ Sustainable Duct Wrap

SoftTouch™ Sustainable Duct Wrap is a fiber glass blanket-type insulation solution that provides thermal efficiency to reduce unwanted heat loss or gain from equipment and ductwork.

The vapor retarder facing helps to eliminate condensation on cold ductwork surfaces.

CertainTeed developed SoftTouch sustainable duct wrap insulation with the end-user in mind. In response to customer feedback, we're pleased to offer a product specially designed to meet contractors' needs. By using world-class quality control measures, our products meet expectations for consistency and specification.

GREENGUARD® Gold standards for low chemical emissions. It's our commitment to building a sustainable environment.

Installer Friendly

SoftTouch features low fiber and dust generation for a low-itch product that's easy on installers. The SoftTouch mat and FSK system cuts better than competing products, providing more efficient installation with less waste and easier handling in the field.

Packaging

The innovative quick-release tape speeds installation time without fiber transfer, offering better appearance and ease of use. There's no secondary packaging to remove in the field, saving time and reducing waste.

The SoftTouch Advantage

CertainTeed's fiberization process, along with our proven formaldehyde-free sustainable binder system, delivers a robust duct wrap product meeting your demand without sacrificing performance, handling or ease of use.

Sustainable Plant-Based Binder

SoftTouch is manufactured with a low-emitting, organic, plant-based, formaldehyde-free binder to reduce VOCs and meets

Proudly made in Athens, GA
