A CertainTeed representative must inspect the completed project.	At CertainTeed's Discretion	At CertainTeed's Discretion	Required	Required

Contractors shall submit all forms and photographs to rpg@saint-gobain.com

This agreement is hereby entered into by and between CertainTeed (hereinafter "CT") and the roofing contractor (hereinafter "contractor") identified below.

In consideration for being approved by CT as a contractor authorized to install roof membranes, pursuant to CT's published Specifications and Application Instructions (hereinafter "Specifications"), which will, subject to the provisions of this agreement, qualify for issuance of the applicable SMARTCOAT Limited Warranty (hereinafter "Warranty"), contractor agrees to be bound by the following terms and conditions:

1. The contractor will use his/her best efforts to promote the distribution and sale of CT roof systems and materials.
2. Only commercial roofing materials manufactured or approved by CT shall be utilized in the application of the roof system.
3. The contractor shall perform all applications of CT roofing materials in a timely and professional manner, and all requirements which are incorporated in CT's published Specifications and installation instructions in effect at the time of application shall be met.
4. The contractor will notify CT at least 14 working days prior to commencing work.
5. A CT inspector shall be allowed to inspect the project site prior to the start of application and/or application of the liquid-applied roof membrane at times and on occasions which shall be within the sole discretion of CT, but which shall not unreasonably impose on the owner of the premises or the contractor, in order to assure that the work being performed by the contractor at the time of the inspection is in conformance with the pertinent CT roofing systems Specifications.
6. The contractor shall employ the necessary supervisory personnel and workers, together with suitable equipment, to complete the work without unnecessary delay and in such a manner as will aid CT to inspect said work at a minimum expense. In the event that it becomes necessary to temporarily discontinue said work, contractor agrees to notify CT as to when said work shall be resumed, and if the contractor fails to give such notice, the Warranty may be rejected at CT's option.
7. The contractor agrees to notify CT promptly following completion of the project in order that CT can conduct an inspection to determine if any installation issues need to be addressed prior to declaring the roof membrane suitable for issuance of the Warranty. Upon completion of the roof, the contractor's copy of the Limited Warranty Application, all other noted necessary photographs and documentation, and accompanied by the balance of the Warranty fee, shall be returned to CT as part of the process leading to issuance of the applicable Warranty. It is a condition precedent to the issuance of the Warranty that the contractor complete and execute his/her copy of the Limited Warranty Application.
8. The contractor shall be responsible for forwarding the written Warranty to the property owner.
9. For SMARTCOAT NDL Limited Warranties, following issuance of the Warranty, a joint inspection of the roof system will be conducted by a CT inspector and the contractor within two (2) years following completion of the roof installation. If such inspection or any other inspection during that 2-year period reveals any unsatisfactory roof or flashing condition which, in the sole opinion of CT, is due to application error or faulty application techniques, the contractor shall, at his/her own expense, immediately make such repairs as are reasonably required by CT to improve the condition of the roof to a level satisfactory to CT. Beyond the aforesaid 2-year period, for SMARTCOAT NDL Limited Warranties, CT will be responsible to the contractor only for repairs which have been authorized by CT.
10. It is hereby mutually agreed that CT reserves the right to unilaterally cancel this agreement, in accordance with Paragraph 13 below, should, at any time during the period of this agreement, any of the following circumstances occur:
 - a) The financial viability of the contractor becomes impaired.
 - b) The contractor fails to comply with the terms of CT's published Specifications.
 - c) The workmanship of the contractor becomes unacceptable to CT.
 - d) The contractor fails to uphold his/her responsibilities and obligations under CT's Warranty program, including, but not limited to, complying with the process implemented by CT for determining whether roof membranes are suitable for issuance of a warranty.
 - e) The contractor or his/her employees make misrepresentations or unauthorized representations to his/her customer regarding CT's policies, products or warranties.
 - f) The contractor fails to complete a construction contract without justifiable cause.
11. The contractor agrees to defend, indemnify and hold CT harmless against any damages it may suffer as a result of misrepresentations made by the contractor to CT, including, but not limited to, misrepresentations made with respect to specific applications of CT products and roof systems.
12. It is agreed that the contractor is an independent contractor, has no authority to make any representations or warranties on behalf of CT, and shall defend, indemnify and hold CT harmless for any damages caused by unauthorized representations, misrepresentations or warranties made by him/her or by his/her employees or agents to parties other than CT. The contractor agrees not to misrepresent to his/her customer the responsibility of CT under its Warranty, and that, if the customer has any specific questions regarding CT's responsibility thereunder, the contractor will promptly transmit such questions to CT.
13. Upon termination of this agreement, the contractor shall cease and desist from representing to the public that he/she is approved by CT to install roof membranes or coatings which will qualify for issuance of a SMARTCOAT Limited Warranty. Termination of this agreement shall not relieve the contractor of any of his /her obligations under Paragraphs 11 and 12 above, or of his/her obligations undertaken with respect to the construction contract or the Warranty issued in connection with a roof system installed pursuant to CT's Warranty program.

The Undersigned agrees to be bound by the terms and conditions of this Application.
