

Machine Works

The easy way to remove loose-fill insulation

These powerful, multi-purpose industrial vacuums make it easy to remove all types of damaged or contaminated loose-fill attic insulation – cellulose, fiberglass or rock wool. Equally useful in wall applications, they allow you to recycle scrubbed material to the blowing machine for mixing into the blend.

Our full line of Vac-Matic equipment includes models with engines ranging from 14 to 23.5 hp, inlet/outlets of four or six inches and suction rates from 3,840 lbs/hr to 9,250 lbs/hr. The line also includes the Vac Drop Box, which can filter out foreign objects and debris that can damage an impeller.

Vac-Matic and Vac-Matic II

- Interchangeable 4" or 6" inlet/outlets
- Ergonomic design
- Small footprint – highly portable
- Electric and pull start
- 2 gallon fuel tank
- 14 hp Kohler engine

Vac-Matic 19 and Vac-Matic 23

- Electric start
- 6" inlet/outlets
- Indirect, belt-driven impeller
- 6 gallon fuel tank
- Solid wheels
- 19 hp and 23.5 hp Kohler engines
